DETAILED ACTION

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

1. Claims 6 – 15 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over US Pat 6,031,904 (An et al.)

An et al. teach a system and method for accessing and modifying or administering a subscriber's telephony features, preferences, data, etc. via an Internet

Application/Control Number: 09/423,501

Art Unit: 2642

access unit 58 or terminal connected to an Internet server, the Internet server being connected to a telephone exchange or switch or central office, etc., and wherein that telephone exchange or switch has a profile repository 1,4 or database pertaining to the aforementioned features.

An et al. teach that the terminal can be connected to the Internet server 50 via either a dial-up modem through a telecommunications network (PSTN 12 for example), or through a LAN (as in a business or hotel when a subscriber is traveling for example) or some type of digital network such as ISDN lines. Furthermore, An et al. teach that the terminal could be a personal computer located at the subscriber's premises or furthermore, could just as well be a personal computer located at a service center for a service representative, i.e., human operator, to operate.

Lastly, as an alternative to the above system and method, An et al. also teach an exchange configuration wherein the web server 50 is run on one of the service manager nodes 16, connected to switch 62 so that the switch 62 realizes the features and contains the database. (Abstract, Figs. 1 – 12, Col. 1, line 32 - Col. 2, line 26, Col. 3, line 1 – Col. 5, line 34)

Inherent in the system of An et al. or any other like system is the functionality that allows html or "web-based" information such as the above features or preferences that would be modified via the web to be converted to a language that can be understood by the actual switch or database connected to the switch. There is no way for Internet communications to be directly sent to the switch and have the switch understand those communications. Therefore, the first and second claimed "switching-oriented"

Application/Control Number: 09/423,501

Art Unit: 2642

applications" are either inherent or at the least obvious in An et al. because such switching applications are essential for translating or converting web-based information into a language or communication understood by the switch. Moreover, the separation of a function or device into two or more functions or devices, as well as where the claimed device or functionality is located does not make for patentability.

Moreover, see Col. 5, lines 26 - 32 and lines 56 - 59. Here, the information transmitted via the Internet is communicated to the profile repositories 18 which are either directly connected to the switch and a switch/service manager or actually located in the switch (Col. 3, lines 27 - 32) and therefore this information again, inherently must be converted into a language understood by the switch. Therefore, again, it is inherent or obvious that the system of An et al. has the claimed first and second "switching-oriented applications."

Response to Arguments

Applicant's arguments filed 1/7/03 have been considered but are unpersuasive.
 The above rejection addresses Applicant's arguments regarding the first and

second switching-oriented applications.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Application/Control Number: 09/423,501

Art Unit: 2642

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hector A. Agdeppa whose telephone number is 703-305-1844. The examiner can normally be reached on Mon thru Fri 9:30am - 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad F. Matar can be reached on 703-305-4731. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9314 for regular communications and 703-872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.
